Reviews

This pdf might be well worth a study, and a lot better than other. It really is simplistic but excitement inside the fifty percent in the book. Its been printed in an exceedingly straightforward way which is just after i finished reading this ebook through which really modified me, modify the way i believe.

The main topics of this present study can be summarized as follows: Population dynamics of *P. tenuivalvata*, its rate of growth and survey of predators and parasitoids associated were conducted through careful inspection of sugar-cane fields. Nymphal infestation started from apical part of plant in the two studying seasons. Also, adult infestation started on apical part of sugar-cane plant in first and second seasons. In both seasons infestation disappear from January to the end of season. Negative Correlation was found between the population density of *P. tenuivalvata* and temperature. Effect of five host plants on different biological aspects of *P. tenuivalvata* was studied and sugar-cane plant was more preferable to the insect than all other tested host plants. Laboratory evaluation of different extracts of spiced centaury *Centaurium spicatum* on the biological aspects of *P. tenuivalvata* was studied and Petroleum ether extract was the most effective extract on all insect stages. 64 pp. Englisch.
