He has sought to render the Solution of Equations of the Third and Fourth Degrees in a more simple form, adapted to an elementary course of instruction in Algebra, to be used in schools and academies. In most treatises on common Algebra the solution and theory of Quadratic equations, or equations of the second degree, are clearly developed in formula simple and easy to be comprehended, and generally accompanied with numerous examples, calculated to interest and encourage the young student; but Equations of the Third and Fourth Degrees, though often introduced by algebraical writers, have been presented in such an unfavourable aspect, and encumbered with so many complex rules, requiring such a vast amount of labour, that the pupil, instead of being interested, becomes weary, and often disgusted, with the obscurity of this department of his subject.
