

Forests to Climate Change Mitigation: Clean Development Mechanism in Bangladesh

By Md. Danesh Miah

Springer. Hardcover. Book Condition: New. Hardcover. 100 pages. Dimensions: 9.3in. x 6.4in. x 0.5in. Today, the effect of global climate change is clear to all. It is clearly dangerous in developing countries such as Bangladesh. The industrial revolution caused major changes in technology, socio-economy and cultures in the late 18th and early 19th century, beginning in Britain and spreading throughout the world. The technology dominated economy was mostly dependent on energy produced from fossil fuel, which still holds true today. It is well known that fossil fuel burning has increased the GHGs to the atmosphere, thus creating global warming. Among the GHGs, the concentration of CO₂ has been confirmed as the largest. Terrestrial ecosystems are clearly influencing the concentration of GHGs in the atmosphere. Greenhouse gases are constantly entering and leaving the atmosphere. Actively growing trees and other plants absorb CO₂ from the atmosphere, combine it with water through photosynthesis and create sugars and more stable carbohydrates. Through this process, trees capture and store atmospheric CO₂ in vegetation, soils and biomass products. The Kyoto Protocol, in 1997, explored a flexible mechanism, CDM (Clean Development Mechanism) where Annex I and non-Annex I parties interact for climate change mitigation. Forestry activities have been...

Reviews

An exceptional ebook along with the font applied was interesting to read through. It was actually written really completely and beneficial. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- Mr. Hector Cole Jr.

This written pdf is wonderful. It can be written in easy phrases and not difficult to understand. Your lifestyle span will likely be enhanced once you fully looking over this ebook.
